MyVector

Enterprise Platform

BAM Technologies

Position

UX Manager & Platform Strategist

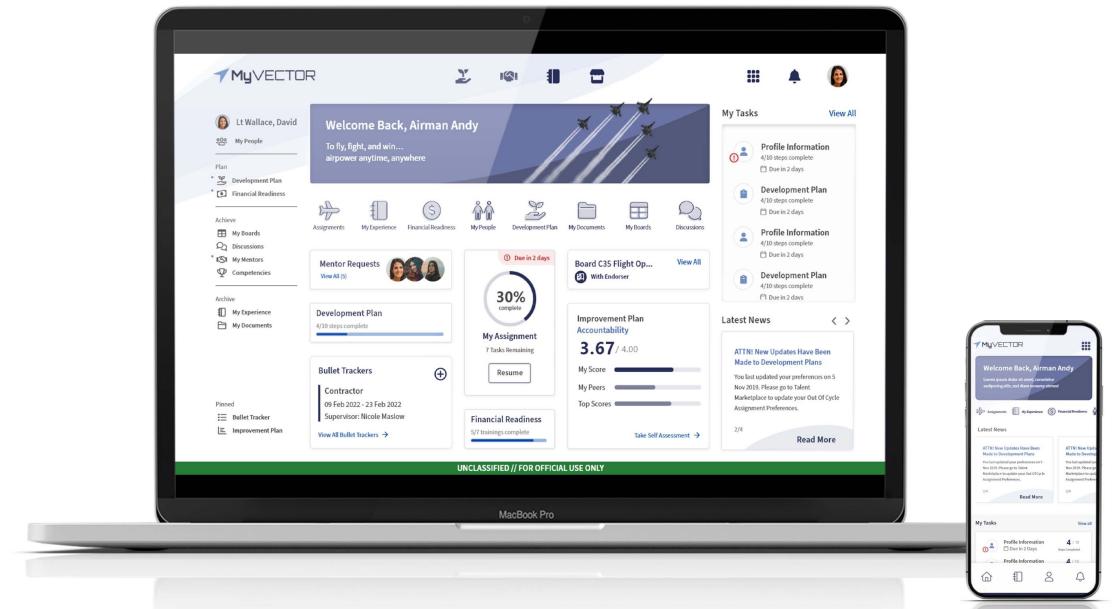

Role

Lead Designer, Strategist, and
Design System Architect

Tools & Technology

Adobe XD & OutSystems

Oversaw the UX strategy, design, and implementation of the MyVector platform, an enterprise platform with more than 500,000 unique visitors per month.

Current Design

The screenshot displays the MyVECTOR application interface. On the left, a dark sidebar menu lists various features: Profile, Mentoring Connections, Development Plan, Experience, Bullet Tracker, Discussions, My People, My Documents, My Boards, Financial Readiness, and Air Force Competencies. The main content area has a light gray background. At the top right, there are navigation links for DASHBOARD, TALENT MARKETPLACE, LATEST NEWS, RESOURCES, HELP, and a user profile for SARAH BARAKAT. A blue button at the top right says "Need help with this page?".

The central area contains several sections:

- Latest News:** A card showing a single news item titled "test" from "As of 06 Aug 2021". It includes a "View All News" link and a pagination bar showing "1 - 1 of 1 items".
- Notifications & Alerts:** A section titled "Global" containing a "Notifications" tab and an "Alerts" tab. It features a prominent orange box with the message "You are eligible for an assignment!" followed by a note about the 2018 Fighter Movers Vulnerable Mover List (VML) and a deadline of "2 Oct 2021". It also mentions a note about potential removed billets and links to "Enter Talent Marketplace".
 - You are a losing commander for Airman on the current VML cycle!**
You have been identified on the 2018 ...Please Stand Up as losing commander for eligible Airman on the VML. Please go to Talent Marketplace to update your input on these Airman.
You have 327 days left until 12 Jul 2022 to provide your input.
Enter Talent Marketplace
 - You are a losing commander for Airman on the current VML cycle!**

- Meeting Test**
You are eligible for the **Jeff Test - Test** Board. The Functional Area you are assigned to is **Science and Engineering**. You are not assigned to a Management Level. If you believe you are not assigned to the correct DT Management Group, then please contact AFPC/DP2LWD at dp2lwd_owd.workflow@us.af.mil.
[Update Your Application](#)

Current Design

Assessment

What it does well

- Clear Simple Navigation
- Menu Starts in the 'Active' state allowing users to easily see the different page options
- Effective use of iconography
- Ability to see Notifications through a 'feed' like feature on dashboard

Room for Improvement

- Unclear what the purpose of the dashboard is
- Not mobile first design
- Singular way to get from one place to another (a good UI has multiple paths a user can travel to reach a desired end location)
- Very 'text' forward--could benefit from more visualizations and the use of design principles to pull out important content

Research & Analysis

Take-a-ways

Apps the Emphasize Growth & Development

- Highly **integrated navigation** and features
- Cross-Platform Compatible
- **Self-reporting** and data from external sources
- **Qualitative** and **Quantitative**
- **Personalized recommendations** that **link features**

Apps the Emphasize Growth & Development

- Highly **integrated navigation** and features that uses **importance to signify the amount of paths** to reach an end-point
- **Mobile first design**
- Strong **emphasis on data input** from devices, game or test score, or other calculated metric
- **Quantitative**
- **Personalized recommendations that provide insights** on your metrics and overall progression

UX Strategy

How to Improve the User Experience

1. Integrated site map that features cross-application linking
2. Data-driven design and visualizations that centralize the user's individual development and career advancement

UX Strategy

How to Improve the User Experience

- 1. Integrated site map that features cross-application linking**
2. Data-driven design and visualizations that centralize the user's individual development and career advancement

UX Strategy

An integrated site map that features cross-application linking

1. Integrated site map that features cross-application linking
2. Data-driven design and visualizations that centralize the user's individual development and career advancement

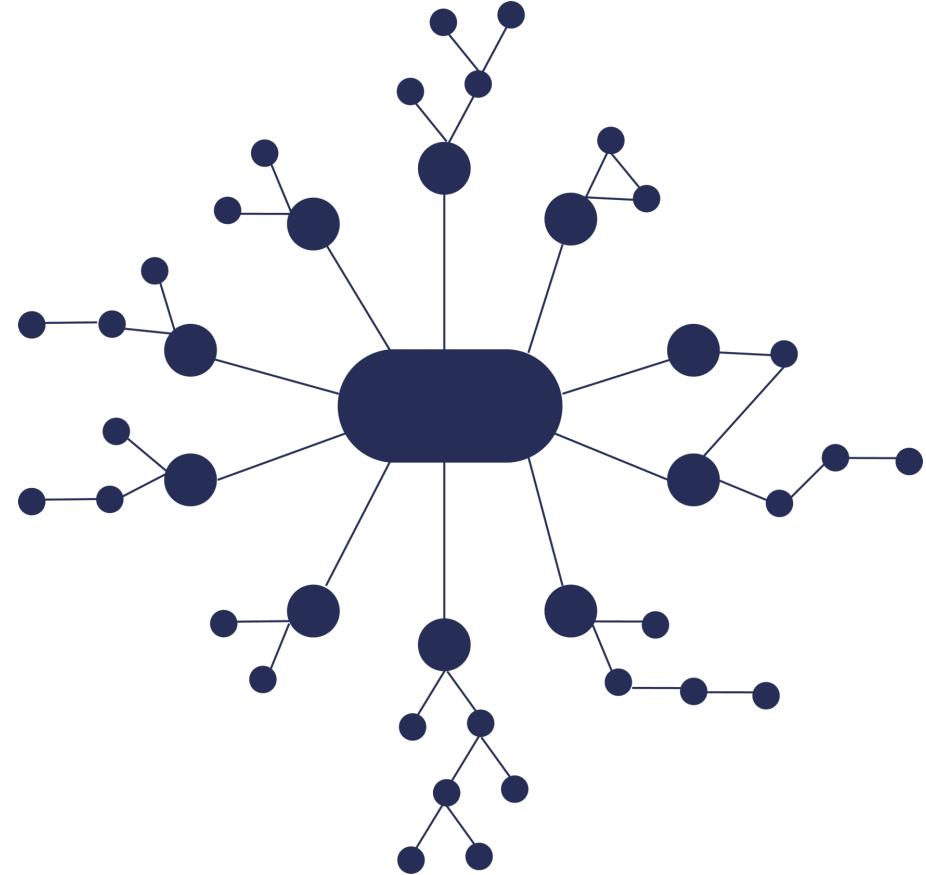

UX Strategy

An integrated site map that features cross-application linking

Currently we have a UI that centralizes the dashboard and provides minimal linking between applications and features

** Infographic is meant to symbolize the site map, but does not serve as an accurate depiction of it.

*** For the context of this graphic, sidebar menu is perceived as an extension of the dashboard.

An overly simple site map can result in...

- Users **left to speculate** how information relates on their own
- Users **missing out** on valuable insights and information
- **Single-path navigation systems** (one-way to navigate to a page)
- **Inconsistent design** (especially when dealing with applications)
- **Missed opportunities** to better serve the user needs

UX Strategy

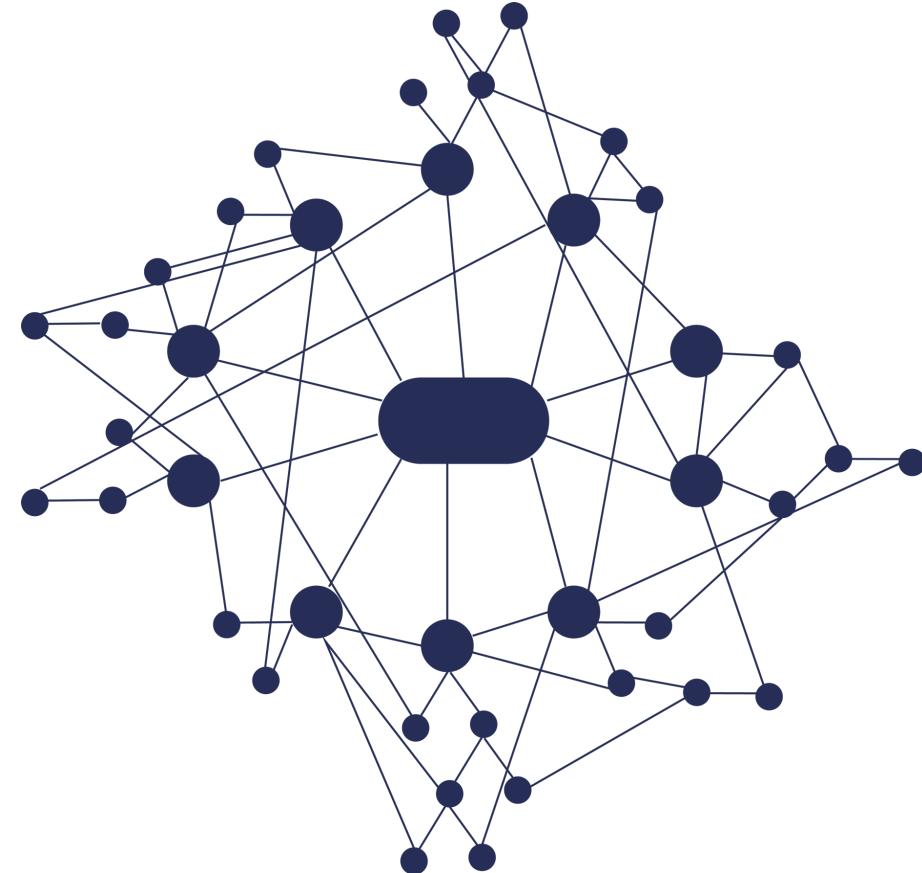

An integrated site map that features cross-application linking

Intentional inter-application linking that is driven by user goals results in smoother transitions between user tasks

By constructing a site map centered around the user's needs, we can solve existing user experience issues and produce a more cohesive and easier-to-use end product.

** Infographic is meant to symbolize the site map, but does not serve as an accurate depiction of it.

*** For the context of this graphic, sidebar menu is perceived as an extension of the dashboard.

UX Strategy

An integrated site map that features cross-application linking

What would the next steps be?

We need to start to define and consider the overlapping and transitioning between the different applications.

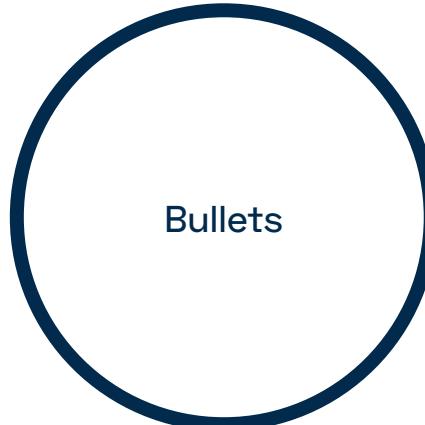

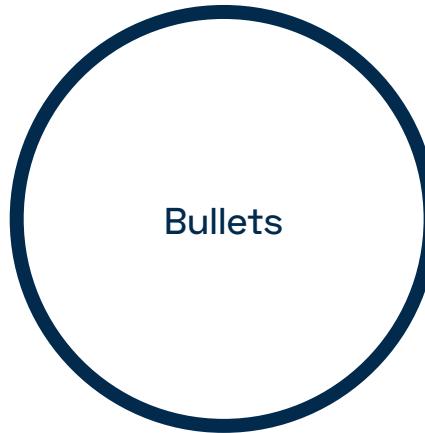

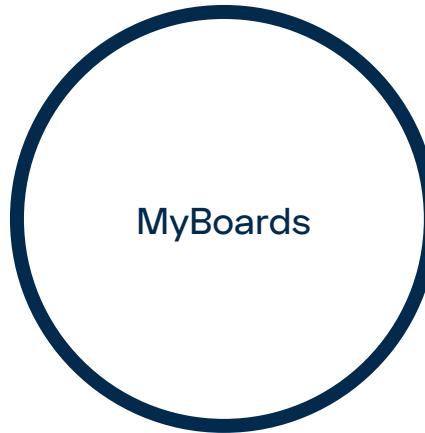

- Build out test profiles that are indicative of real user personas
- Perform detailed analysis of the overlaps between applications

John Smith

Development Plan and MyBoards

Boards are recorded in an individual's development plan. They are accessed when setting goals, assessing qualifications for different positions, and determining if the individual is on track in their career.

Presently, Boards do not use development plans, however, there is a potential opportunity here to show the airman boards that align with their development plan either through a search filter, notification, etc.

UX Strategy

How to Improve the User Experience

1. Integrated site map that features cross-application linking
2. **Data-driven design and visualizations that centralize the user's individual development and career advancement**

UX Strategy

Data-driven design and visualizations that centralize the user's individual development and career advancement

A collaboration between Outsystem's UI and Data Analytics that centralizes the user's individual development and career advancement

Key Points for Consideration

- Knowledge graphs and other complex information structures don't always succeed, how do shape the end idea so that there is **a fail-safe built into the proposed solution?**
- How do we **overcome limitations in data available?**
- How do we determine the types of **information that would be most valuable** to the end user?
- How do we **clearly communicate** career progression?
- How do we **visually** allow users to **track their progression?**

Fail Safe

Current

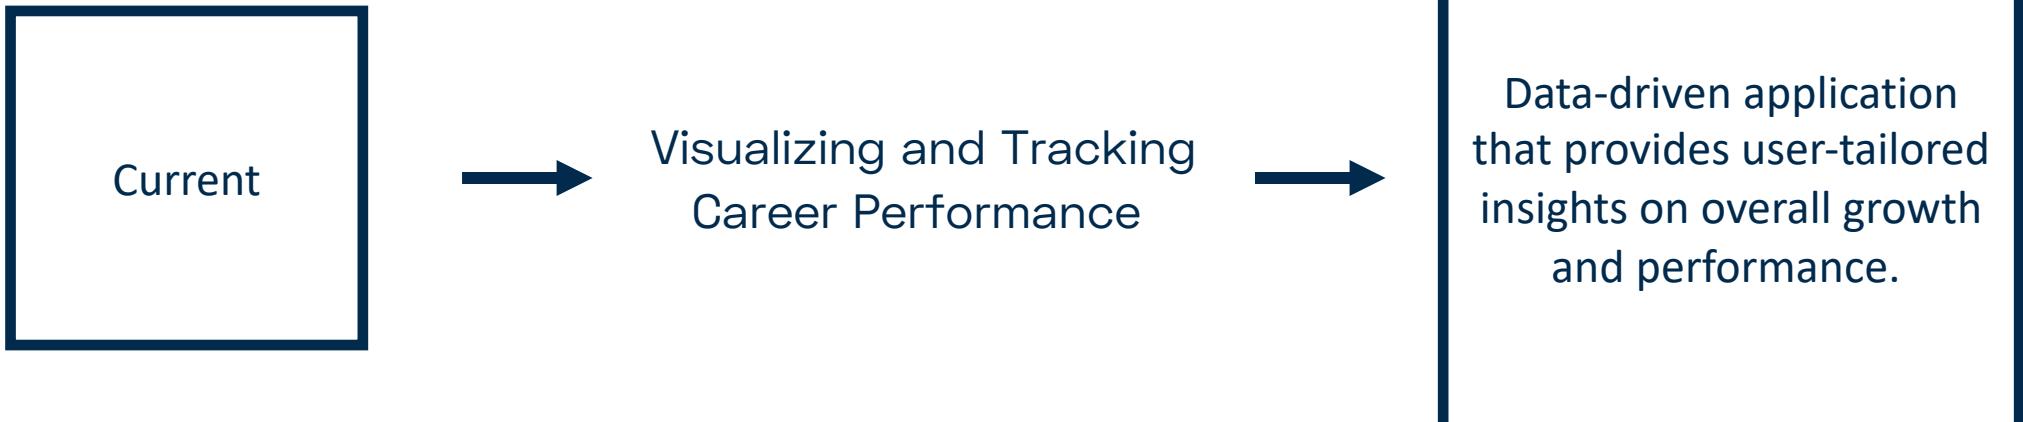

?

Data-driven application
that provides user-tailored
insights on overall growth
and performance.

Fail Safe

UX Strategy

Data-driven design and visualizations that centralize the user's individual development and career advancement

Visualizing and Tracking Career Performances

1. Performance assessment analytics
2. Personalized reminders
3. Cross application recommendations
4. User-tailored dashboard interface

Performance Assessment Analytics

- Allows users to **contextualize their progress** through clear, concise data visualizations
- **Break down complex metrics** into simple, digestible action items
- Give users **the power to take control** of their **individual growth and development**
- Provide the user with **the ability to compare their performance with others of equal rank and position**
- Create new **potential opportunities** for **personalized notifications** for the user

UI/UX Design Work

Command Center (Formerly MyVector Dashboard)

The screenshot displays the Command Center interface, which was formerly known as the MyVector Dashboard. The left sidebar contains a navigation menu with links such as Profile, Monitoring Connections, Development Plan, Experience, Bullet Tracker, Discussions, My People, My Documents, My Boards, Financial Readiness, Air Force Competencies, and Jeff Test - Test Board. The main content area features several notifications and alerts:

- Latest News:** A section titled "test" with a timestamp of "As of 06 Aug 2021 testtest". It includes a "View All News" button and a note: "1 - 1 of 1 items".
- Notifications & Alerts:** A header for "Notifications & Alerts" with tabs for "Notifications" and "Alerts". A prominent message states: "You are eligible for an assignment! You were identified on the 2018 - Fighter Movers Vulnerable Mover List (VML). You have 44 days left until 2 Oct 2021 to update your Marketplace Assignment Preferences. Note: it is possible that one or more of your preferred billets may have been removed during this review." It also includes a link to "Enter Talent Marketplace".
- You are a losing commander for Airman on the current VML cycle!**: A message stating: "You have been identified on the 2018 - ...Please Stand Up as losing commander for eligible Airman on the VML. Please go to Talent Marketplace to update your input on these Airman. You have 327 days left until 12 Jul 2022 to provide your input." It includes a link to "Enter Talent Marketplace".
- You are a losing commander for Airman on the current VML cycle!**: A message stating: "You have been identified on the 2018 - ...Please Stand Up as losing commander for eligible Airman on the VML. Please go to Talent Marketplace to make your reclama requests for these Airman. You have 327 days left until 12 Jul 2022 to make your reclama requests." It includes a link to "Enter Talent Marketplace".
- You are a member of a Management Level for Airman on the current VML cycle!**: A message stating: "You have been identified on the 2018 - ...Please Stand Up as a member of a Management Level for eligible Airman on the VML. Please go to Talent Marketplace to make your reclama requests for these Airman. You have 327 days left until 12 Jul 2022 to make your reclama requests." It includes a link to "Enter Talent Marketplace".
- You are an Assignment Coordination Authority**: A message stating: "You have been identified as an Assignment Coordination Authority. Your coordination is required. Please go to Talent Marketplace to review the assignment details and take action." It includes a link to "Enter Talent Marketplace".
- Assignment Travel Screening Required!**: A message stating: "You have recently received a new assignment. Please take a moment to complete the Assignment Travel Screening questionnaire today. Click Here to begin the screening process." It includes a link to "Click Here".
- Meeting Test**: A message stating: "You are eligible for the Jeff Test - Test Board. The Functional Area you are assigned to is Science and Engineering. You are not assigned to a Management Level. If you believe you are not assigned to the correct DT Management Group, then please contact AFPC/DP2LWD at dp2lwd_owd.workflow@us.af.mil." It includes a link to "Update Your Application".

UI/UX Design Work

Command Center (Formerly MyVector Dashboard)

The screenshot displays the Command Center dashboard for Airman Andy. The top navigation bar includes icons for Home, Profile, Notifications, and Account. The left sidebar shows the user's name, Lt Wallace, David, and links for Plan (Development Plan, Financial Readiness), Achieve (Assignments, My Experience, Financial Readiness, My People, Development Plan, My Documents, My Boards, Discussions), Mentor Requests (View All 5), Development Plan (4/10 steps complete), Bullet Trackers (Contractor, Supervisor: Nicole Maslow, View All Bullet Trackers), and Pinned (Bullet Tracker, Improvement Plan). The main content area features a welcome message: "Welcome Back, Airman Andy. To fly, fight, and win... airpower anytime, anywhere." Below this are several cards: "Mentor Requests" (View All 5), "Development Plan" (4/10 steps complete), "Bullet Trackers" (Contractor, Supervisor: Nicole Maslow, View All Bullet Trackers), "Financial Readiness" (5/7 trainings complete), "My Assignment" (30% complete, Due in 2 days, Resume button), "Improvement Plan Accountability" (3.67 / 4.00, My Score, My Peers, Top Scores, Take Self Assessment button), and "Latest News" (ATTN! New Updates Have Been Made to Development Plans, You last updated your preferences on 5 Nov 2019, Read More button). A green footer bar at the bottom reads "UNCLASSIFIED // FOR OFFICIAL USE ONLY".

The screenshot shows the MyVECTO Command Center. At the top left is a user profile picture of Lt Wallace, David. Below it is a section titled "My People". The main navigation area is divided into three sections: "Plan" (highlighted with a yellow border), "Achieve" (highlighted with a blue border), and "Archive" (highlighted with a red border). Each section contains a list of items with icons:

- Plan:** Development Plan, Financial Readiness
- Achieve:** My Boards, Discussions, My Mentors, Competencies
- Archive:** My Experience, My Documents

Providing a meaningful way of organizing the navigation items

Navigation items that exist on the left—and panel of the Command Center (the page the user sees when they enter the application) are organized using an abstracted form of Past, Present, and Future.

Note: While this navigation structure is being used here, it is not consistent throughout the application. In an effort to support a wide variety of use cases, it was decided to use this structuring where it made the most sense for the primary use case of the space. In addition, this structuring could not be used in an interface if it was the only way to navigate between areas of the application.

Shortcut Navigation

The Command Center also features a shortcut navigation that allows users to navigate to key areas of the application

My Task List

To help the airman identify what outstanding tasks they have, we created a separate place for these notification items to exist. Anything shown in MyTasks will still show up in the notification list, but because they are now a different type of notification item they can be easily pulled into any page and we can allow the user to filter their notifications by 'tasks'.

UI/UX Design Work

DTNA Dashboard

The previous design featured a series of tiles on the page to navigate to different areas relating to the DTNA process.

UI/UX Design Work

DTNA Dashboard

Design Concept

The dashboard was built to be a series of interchangeable widgets. This will allow the page to grow and evolve as the customer's needs change.

My Dependents

Rather than having a tile to navigate to dependents, we created a widget that allows the user to preview their dependents, with an easy way to navigate to the complete list.

The screenshot shows the DTNA Dashboard interface. At the top, there is a header with the MyVECTOR logo, navigation links (Home, Level 2, Active Page), and user information (Projected Assignment: AAN 0520N00840, 123 Aviation Pkwy, 23 Mar 2000). Below the header, the main content area is titled "DTNA Dashboard". On the left, a "My Dependents" widget displays a large green "0" and a smaller green "7" in adjacent boxes, indicating the number of dependents. Below this, it says "DAYS REMAINING to submit a request" and shows a clock icon. To the right of this is a section titled "Please select one of the following options:" containing three "Reconsideration" buttons, each with a person icon and the text "Request reconsideration of DTNA determination in light of new medical information." and an "Enabled" button. At the bottom of this section is a "View All Dependents" link and a "Continue" button. The footer of the page is a green bar with the text "UNCLASSIFIED // FOR OFFICIAL USE ONLY".
